

Special Issue

Molecular Diagnosis and Treatment of Oral Cancer

Message from the Guest Editor

Oral cancer, predominantly oral squamous cell carcinoma (OSCC), is a significant worldwide health challenge, characterized by intricate molecular mechanisms and minimal progress in long-term patient outcomes. Enhancing the early identification of oral cancer through molecular techniques and the use of targeted therapies tailored to specific tumor characteristics may significantly improve patient outcomes and quality of life. This Special Issue of the International Journal of Molecular Sciences aims to gather high-quality basic and clinical research that advances our understanding of oral cancer from a translational perspective. We invite submissions of original research articles, reviews, and perspectives that explore the molecular mechanisms underlying oral carcinogenesis, the development of novel biomarkers for early detection, and advances in targeted therapies and immunomodulatory strategies.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
