Molecular Insights into Breast Cancer: Advanced Development and Therapeutic Strategies

Message from the Guest Editor

Breast cancer remains one of the most common cancers in women, and despite improved early diagnosis and treatments, many women will still die from this disease. This Special Issue will gather reviews and original research articles covering molecular aspects of the biology and pathology of breast cancer in humans and model organisms. Topics gathered will emphasize ways to achieve the genesis and progression of novel therapeutic approaches to breast cancer, especially for triple-negative and HER2+ breast cancers. The development of breast cancer therapies, including new agents, endocrine therapy, radiation therapy, and genomic and other translational approaches such as circulating tumor DNA is of particular interest. We invite contributions of original research papers and up-to-date review articles about breast cancer at basic, translational, and molecular levels for a Special Issue with expert insights and perspectives on molecular advances in the field of breast cancer.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
