Sjogren's Disease: Multidimensional Perspectives on Pathogenesis, Clinical Manifestations, and Therapeutic Advancements

Message from the Guest Editor

Sjögren's disease (SjD) is a common autoimmune disease, typically characterized by lymphocytic infiltration and tissue destruction of the salivary and lachrymal glands, leading to dry mouth and dry eye symptoms. SjD can be further complicated by systemic inflammations, including interstitial lung diseases, kidney injuries, malignancies, etc., which are among the most high-risk systemic autoimmune diseases.

In this Special Issue, we invite submissions that elucidate the molecular mechanisms underlying the pathogenesis, clinical manifestations, and therapeutic advancements of SjD. We seek original research articles that delve into genetic deposition and the molecular dynamics of disease initiation and progression, focusing on lymphocyte activation and function, glandular epithelial and endothelial cells, environmental factors (e.g., oxidative stress, cytokines, chemokines, etc.), and the functional characterization of autoantigens and autoantibody production. Additionally, we welcome comprehensive review articles in these domains, as well as innovative research on therapeutic targets, treatment strategies, novel diagnostic methodologies, and potential biomarkers.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
