Innovative Antimicrobial Therapies: Overcoming Virulence of Microorganisms and Drug Resistance

Message from the Guest Editor

Infectious disease is the result of the virulence of the microorganism, the condition of the host, and the presence of various favourable environmental factors. Understanding complex host–microbe and microbe–microbe interactions can help us to identify the specific role of microorganisms in human health and disease and allows for targeted interventions. Antibiotics, antivirals, antifungals, and antiparasitic drugs are now widely used to prevent and treat human infections. The price of widespread access to anti-infectives is the development of antimicrobial resistance (AMR). New treatment strategies and a new generation of therapies are urgently needed. Drugs with unique chemical structures, new mechanisms of action and high barriers to resistance can be an answer to the multi-faceted global challenge of AMR.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
