Exploring Phage–Host Interactions: Novel Findings and Perspectives

Message from the Guest Editor

I am pleased to launch a Special Issue entitled “Exploring Phage–Host Interactions: Novel Findings and Perspectives”. This Special Issue provides a platform for publishing original research papers and reviews exploring the interactions between phages and their bacterial hosts on multiple levels. We eagerly invite studies employing diverse omics methodologies to unravel the details of phage–host interactions, spanning from the microscopic realm of single cells to the grand scale of ecological communities. Embracing both more classical and cutting-edge technologies, we aspire to uncover new frontiers in understanding these interactions at both physical and molecular levels. By including both basic and applied research, we aim to bridge the gap between theory and real-world applications, ensuring practical impact across biotechnology, medicine, and environmental management. We aim to assemble top phage researchers to contribute to this Special Issue and sincerely hope that the provided information will attract your interest and encourage you to provide your contributions to this call.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
