

## Special Issue

# Latest Research Progress of Biomaterial Modification

### Message from the Guest Editor

The use of biopolymers in various scientific fields is becoming increasingly significant. Their various applications in the areas of medicine, biomedicine, or the food industry are important. It has been found that isolated biopolymers cannot be used in their natural form due to variations in their physico-chemical properties, making it difficult to assemble or incorporate them in other polymeric substrates, such as fibers or synthetic polymers.

Research studies allow for the expansion of biopolymer applications using diverse modification techniques via their incorporation in new basic structures. These have been achieved by recent funaggregation mechanisms, simulations, and the combination of PLA with several derivatives. Industrial sectors are fundamental, promoting the dissemination of new concepts and generating new fields of application capable of establishing a very clear and structured knowledge. We welcome all contributions to the development of new systems, new procedures, and new products to increase the level of knowledge in this Special Issue.

### Guest Editor

Prof. Dr. Manuel José Lis

INTEXTER-UPC, Surface Science Laboratory, Colon 15, 08222  
Terrassa, Spain

### Deadline for manuscript submissions

30 June 2026

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
