

Special Issue

Role of Dopamine in Health and Disease: Biological Aspect 2.0

Message from the Guest Editors

The dopaminergic system controls several vital central and peripheral nervous system functions, among others cognition, reward behaviors, processing of aversive experiences, and control of movement. Alterations of dopaminergic neurotransmission are involved in the pathogenesis mental of neurodegenerative disorders. The special issue with the leading topic of dopamine is an excellent opportunity for researchers, who deal with it, to share their knowledge. The major topic is dopamine in health and disease, but it can be presented from a different perspective—including basic, associative, genetic, and epigenetic research studies. We invite you to publish your papers within these subject areas: dopamine in addictions; dopamine in sports; dopamine in neurological diseases; dopamine as a neurotransmitter of happiness.

Guest Editors

Prof. Dr. Anna Grzywacz

1. Department of Public Health, Epidemiology and Behavioral Genetics, Pomeranian Medical University in Szczecin, Powstancow Wielkopolskich 72 St., 70-111 Szczecin, Poland

2. Department of Medical Sciences and Public Health, Gdansk University of Physical Education and Sport, Kazimierza Gorskiego 1 St., 80-336 Gdansk, Poland

Prof. Dr. Jolanta Masiak

Neurophysiological Independent Unit, Department of Psychiatry, Medical University of Lublin, 20-093 Lublin, Poland

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
