

Special Issue

Molecular Applications of Antioxidants and Anti-Inflammatory Activities of Natural Products

Message from the Guest Editor

This Special Issue, titled “Molecular Applications of Antioxidants and Anti-Inflammatory Activities of Natural Products”, focuses on the exploration of natural compounds with antioxidant and anti-inflammatory properties at the molecular level. Natural products are a rich source of bioactive molecules that play a key role in mitigating oxidative stress and inflammation—key factors contributing to numerous chronic diseases and aging.

This Special Issue invites original research and review articles that reveal the molecular mechanisms underlying these effects, including signaling pathways, molecular interactions, and cellular targets. Studies using advanced molecular techniques, such as genomics, proteomics, and metabolomics, to elucidate the therapeutic potential of natural products are highly encouraged. While partial clinical research and survey studies fall outside the scope, contributions presenting molecular-level insights into the biological activity of natural compounds are particularly welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, MEDLINE, Embase, CAPlus / SciFinder, and other
databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
