

Special Issue

Focus on Metabolic Research Priorities in PCOS

Message from the Guest Editor

Polycystic Ovary Syndrome (PCOS) contributes to the chronic disease epidemic and presents a significant global health challenge. PCOS affects 8–13% of women, and it usually presents in adolescence with a complex mixture of symptoms that result from underlying metabolic and endocrine disturbance.

This Special Issue would like to invite research directed to investigating the metabolic aspects of PCOS, particularly those that address evidence–practice gaps. We encourage the submission of a wide range of related research topics. This could include discovery research to help understand the pathophysiological causes and mechanisms of PCOS, clinical research to improve diagnosis and management, clinical trials focused on integrated multiomics, the assessment of wearable, digital, personalized monitoring technology, or research investigating the bidirectional relationships between insulin resistance, chronic inflammation, and hyperandrogenism. We welcome original papers and reviews.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
