# Research in Cannabinoid Therapeutics: Novel Insights and Products

### Message from the Guest Editors

Every day, progress is being made in determining the distribution of the components of the endocannabinoid system (ECS) and how they are modulated and regulated by endogenous and exogenous ligands. The characteristics and properties of the ECS and its components have been explored in health and pathological conditions in various study systems, aiming to establish what mechanisms underlie the effects and symptomatic improvements observed in both study models and the traditional use of therapeutic cannabis. Current research focuses on the effects and properties of acidic cannabinoids (CBDA, THCA) and minor cannabinoids (such as CBG, CBN, CBC, THCV and CBDV) as active ingredients, as well as the development and stability of derivatives based on these components. We particularly seek manuscripts that present advances in the therapeutic application of cannabinoids and characterize full-spectrum preparations. Studies that incorporate novel applications of cannabis derivatives for therapeutic use are also encouraged, given the growing interest in utilizing acidic cannabinoids or other cannabinoids.

### Guest Editors

Prof. Dr. Daniela Sedan

Environmental Research Center (CIM), National Council for Scientific and Technical Research (CONICET), National University of La Plata (UNLP), La Plata, Argentina

Dr. Dario Andrinolo

Area of Toxicology, Centre for Environmental Research, Exact Sciences Faculty, National University of La Plata, National Council of Scientific and Technical Research (CIMA-FCE-UNLP-CONICET), La Plata 1900, Argentina

### Deadline for manuscript submissions

31 August 2026

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
