

Topical Collection

Feature Papers in Molecular Immunology

Message from the Collection Editors

The Topical Collection on Molecular Immunology aims to rapidly publish original contributions addressing questions of importance in immunology and related fields. We welcome manuscripts conveying novel experimental findings that advance our understanding of molecular mechanisms of immunity, immunogenetics, and/or immunopathogenesis. Manuscripts reporting the development or testing of novel therapeutics that target molecular mechanisms are likewise sought. Manuscripts reviewing topics pertinent to the scope of the Section Molecular Immunology will be considered if the manuscripts offer an analysis of existing knowledge and/or a perspective that is not otherwise available.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
