

Special Issue

Recent Research of Phytochemicals in Health and Disease

Message from the Guest Editors

Although phytochemicals have been used for medical practices for thousands of years, recently, their biological effects have been determined in detail at the molecular and gene expression level. We still need published scientific evidence to enhance our understanding of their effects and side effects in order to improve our health and recover from injuries and diseases. Phytochemicals can be used in multiple ways to improve or maintain our health. In this Special Issue, we invite papers that focus on the effects/side effects of phytochemicals, delivery methods and formulation of phytochemicals to enhance their effects, effects on brain function (anxiety, cognitive function, etc.), regeneration and wound healing, and treatment and/or prevention from diseases. Papers can also focus on the use of phytochemicals as drugs, as supplements for drugs to improve the effects of drugs, and as supplements to improve or maintain healthy conditions. All of these topics can be addressed in original papers or reviews.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
