

Special Issue

Molecular Research on Bacteria: 2nd Edition

Message from the Guest Editor

This Special Issue is a continuation of our previous Special Issue, "[Molecular Research on Bacteria](#)." Research on bacteria remains an open field today due to the identification of emerging new species and clinical isolates resistant to most antibiotics in use. Fortunately, therapeutic approaches are evolving with the integration of new strategies, such as antivirulence therapies, drug repurposing, and phage therapy. On the other hand, new research is focusing on the use of non-pathogenic bacteria for beneficial purposes, such as bioremediation and biore restoration. This Special Issue aims to collate original papers and reviews on bacteria research, with particular relevance on the molecular level.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
