Advances in Prostate Cancer Diagnostics and Therapy

Message from the Guest Editor

Prostate cancer is still the second most commonly diagnosed cancer in men and accounts for 1.4 million diagnoses worldwide. Despite recent advances in diagnostics and treatment of prostate cancer, many questions remain unanswered. Prostate-specific membrane antigen-based imaging and therapy is a promising, quickly evolving field of research. Notably, patients with early biochemical recurrence might benefit from improved imaging prior to salvage therapy. In addition, studies have shown promising results in patients with advanced metastatic disease. However, many molecular pathways and their interaction with the androgen receptor are not yet fully elucidated. This Special Issue of the *International Journal of Molecular Sciences* will focus on recent “Advances in Prostate Cancer Diagnostics and Therapy”, including new insights into pathogenesis and molecular pathways. Submissions dealing with biomarkers, molecular pathways, improvements in prostate cancer imaging, and therapy are highly welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
