Cellular, Molecular and Carcinogenic Effects of Radiation

Message from the Guest Editors

The cellular and molecular effects of radiation have become a powerful discipline and tool for detailed investigations into the biological mechanisms of the problems and clinical aspects of modern radiation oncology and radiation biology. Moreover, experimental radiation oncology in interdisciplinary collaborations with biophysics, molecular biology, biochemistry, and immunology covers an essential element in translational radiation biology research. This growing interest in the field of radiation, composed of complex molecular circuits in normal and cancer cell types, has resulted in the emergence of innovative research areas covering biological targeting and exploring the impact of the microenvironment and immune system to combat radiation responses. In this Special Issue, we aim to bring together original research and review articles addressing the current landscape of radiobiological research covering DNA repair/damage response, aspects of immune modulation, tumor–stroma interactions, molecular targeting, biomarkers of radiation exposure, and the impact of different radiation qualities.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
