

Special Issue

Immunotherapy of Brain Tumor

Message from the Guest Editor

Brain tumors are all orphan diseases, and the prognosis of malignant brain tumors remains bad despite a significant amount of preclinical and clinical research. Immunotherapy is a novel emerging field, which might also be applied for brain tumors, and intensive research is taking place today in different domains of immunotherapy for brain cancer (passive immunotherapy, adoptive immunotherapy, immunogenic cell death immunotherapy with oncolytic viruses and physics therapies, active specific immunotherapy with vaccines, modulatory immunotherapy). The aim is not only to kill tumor cells, but also to change the tumor microenvironment and to improve the systemic immune compartment. Multimodal immunotherapies are emerging. This Special Issue of the *International Journal of Molecular Sciences* aims to collect state-of-the-art knowledge as well as cutting-edge evolutions and perspectives in the field. Therefore, a broad group of researchers and clinicians are invited to contribute their insights so that readers and patients have an updated overview of the design of therapies to treat brain cancer. About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
