Advanced Therapeutic Applications of Mesenchymal Stromal Cells (MSCs)

Message from the Guest Editor

Mesenchymal stromal cells (MSCs) represent a multipotent stem cell population originating from the mesoderm and attract the interest of the scientific community due to their beneficial applications in regenerative medicine. Although MSCs possess the ability to differentiate into various cell types, they are also associated with key interactions within the immune system, MSCs are capable of presenting antigenic epitopes, thereby inducing immune responses, while also exhibiting notable immunoregulatory properties that can promote the tolerance of overactivated immune responses. The main aim of this Special Issue is to cover recent progress in the development of advanced therapeutic applications utilizing MSCs for human disorders. This Special Issue welcomes the submission of original research articles, reviews, meta-analyses, and opinion reports that focus on modern applications of MSCs. As an invited scholar, your manuscript submitted to this special issue will enjoy a 20% discount.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
