

Special Issue

Synthesis of Advanced Polymer Materials

Message from the Guest Editor

Polymer materials are found in almost every material used in daily life, and their importance has been highlighted because of their wide applications. With the rapid development of modern society, developing new and/or advanced polymer materials is constantly required. Therefore, the synthesis of advanced polymers has attracted considerable attention. This Special Issue of the *International Journal of Molecular Sciences* will focus on a collection of excellent research articles and review papers related to the synthesis of advanced polymer materials involving polymer synthesis, polymer chemistry, and polymer functionalization and modification. Every paper submitted for consideration is welcomed to report novel synthesis techniques, new synthesis methods and approaches (especially catalytic systems for polymer synthesis), new polymer materials originating from new monomers or comonomers, chemical modifications of polymers, etc. Topics of interest for this Special Issue include, but are not limited to:

Polymer synthesis; Polymer chemistry; Coordination polymerization; Organometallic catalysts; Polyolefin; Green and sustainable polymeric materials.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
