Stem Cell Activation in Adult Organism 2023

Message from the Guest Editor

Research on stem cells has developed as a promising area of biology in the last few decades. Meanwhile, the potential of stem cell-based tissue regeneration in adult organisms is recognized for nearly all organs and tissues, such as muscle, heart, brain, lung, mesenchymal, epithelial, and connective tissues. This Special Issue will cover a selection of recent research topics and current review articles in the field of stem cell research for the regeneration and repair of different tissues and organs in adult organisms. Experimental papers, up-to-date review articles, and commentaries are all welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
