Special Issue

Molecular Research in Protein-Ligand Interactions

Message from the Guest Editor

Drug discovery is a process where bioactive compounds are designed and screened either on the basis of specific molecular targets or by the identification of active ingredients from traditional medicine, as well as by serendipitous discovery. Both forward and reverse pharmacology approaches not only require a deep knowledge of the molecular processes involved in each pathological condition and disease but also the specific protein targets and the effects of drug binding on the conformation and activity of the proteins involved. This Special Issue focuses on recent studies that aimed to investigate protein-ligand interactions, with a special aim of elucidating the molecular mode of action and the protein targets of drugs as well as natural compounds, and the cellular pathways involved. Studies providing such information are welcomed and will help to elucidate the molecular basis for many drugs' activity and the development of new drugs.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
