

Special Issue

Xenobiotics and Redox Regulation

Message from the Guest Editor

In this Special Issue, we invite authors to contribute their original manuscripts that describe the role of xenobiotics, including environmental pollutants, drugs, and dietary components, in cell metabolism regulation. This Special Issue aims to describe the complex relationship between xenobiotics and redox regulation, which depends on the specific chemical compound and its concentration, as well as the individual's overall health and exposure history. This Special Issue is supervised by and assisted by Dr. Fotios Tekos (University of Thessaly) and Dr. Zoi Skaperda (University of Thessaly).

Guest Editor

Prof. Dr. Demetrios Kouretas

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
