

## Special Issue

# Innovative Solutions in Pharmacokinetics and Translational Research

### Message from the Guest Editor

This Special Issue aims to cover a comprehensive array of topics related to pharmacokinetics and translational research, including the pharmacokinetic study of special drug delivery systems, drug metabolism and transport, personalized medicine, drug–drug or herb–drug interactions, in silico pharmacokinetics to optimize drug design and development, therapeutic monitoring, and regulatory and safety considerations. We extend the invitation to researchers, scientists, and practitioners to contribute original research articles, reviews, case studies, and perspective pieces that advance our understanding of pharmacokinetics and translational research. Submissions should present new insights, innovative methodologies, and practical applications that address current challenges and future perspectives in these fields.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
