

## Special Issue

# Molecular Targets of Disease— Changing Treatment Strategies for Parkinson's Disease

### Message from the Guest Editor

This Special Issue will cover how these exciting potential molecular target technologies, including novel theranostic agents, stem cell transplantation, ultrasound-assisted drugs or nucleic acid delivery, biomedical applications, etc., are changing treatment strategies for PD. We expect this Special Issue to inspire more innovations in research by revealing previously used molecular targeting technologies in the search for methods that effectively treat diseases.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
