Plant Phylogenomics and Genetic Diversity

Message from the Guest Editors

This special issue welcomes manuscripts that advance knowledge and understanding of plant phylogeny, evolutionary history, and genetic diversity on a genomic basis. Topics covered by this issue include, but are not limited to:

- Establishment and clarification of plant evolutionary relationships;
- Gene family evolution;
- Species diversity;
- Improvements in methods for acquiring genomic data;
- Plant speciation;
- Ecological and genomic interactions;
- Genotype-phenotype relationships.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
