

Special Issue

Editorial Board Members' Collection Series: Autoimmune Diseases

Message from the Guest Editors

This special issue, dedicated to autoimmunity, attempts to present autoimmune diseases (ADs) into a comprehensive overview of how the immune system turns against self targeting in different conditions according to a balance determined by the genetic predisposition of the host, its gender, epigenetic factors, environmental circumstances and other co-factors. Moreover current knowledge from human and animal models are welcome regarding pathogenic mechanisms of autoimmune diseases, clinical aspects of specific autoimmune diseases, as well as insights regarding biomarkers and specific therapies.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
