ErbB Family of Receptor Tyrosine Kinases in Cancer and Drug Therapy

Message from the Guest Editors

The ErbB family of receptor tyrosine kinases (RTKs) includes the epidermal growth factor receptor (EGFR) or ErbB1/Her1, ErbB2/Her2, ErbB3/Her3, and ErbB4/Her4. These RTKs are key regulators of physiological processes, such as cell growth, survival, and differentiation. Dysregulation of ErbB receptors is implicated in the development and progression of many types of cancers, making them targets for therapeutic strategies. This Special Issue will focus on the latest advancements in understanding the molecular mechanisms underlying the role of ErbB family members in tumorigenesis, and the development of novel therapeutic strategies targeting these receptors. In addition to therapeutic approaches, we will also address the challenge of resistance to ErbB-targeted therapies and explore strategies to overcome this resistance, including combination approaches. Original research articles and reviews exploring both basic and clinical research are welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
