# **Special Issue**

# Advances in Molecular Mechanisms of Neurodegeneration and Neuroinflammation

# Message from the Guest Editors

Neurodegenerative disorders, including Alzheimer's disease, Parkinson's disease, and amyotrophic lateral sclerosis, are characterized by the progressive loss of neurons and cognitive and/or motor impairments. Mounting evidence has revealed that neuroinflammation plays a pivotal role in the onset and progression of these disorders, interacting closely with cellular and molecular events such as oxidative stress, protein aggregation, mitochondrial dysfunction, and impaired autophagy. We invite original research articles, reviews, and short communications that focus on, but are not limited to, the roles of glial cell activation, immune signaling cascades, non-coding RNAs, epigenetic regulation, and novel therapeutic targets modulating these mechanisms. Submissions involving in vitro, in vivo, or computational models, as well as translational studies investigating potential biomarkers or pharmacological interventions, are welcome. This Special Issue seeks to provide a platform for the latest findings that could foster the development of innovative therapeutic strategies to prevent or delay neurodegeneration and its associated pathologies.

# Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## **Editor-in-Chief**

#### Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.
