Deciphering the Dynamics: Exploring Tumor Evolution in Cancer

Message from the Guest Editor

We are excited to announce a Special Issue dedicated to exploring the intricate landscape of tumor evolution in cancer. As our understanding of cancer continues to evolve, unraveling the complexities of tumor progression and response to treatment remains paramount. We invite researchers from diverse backgrounds to contribute their cutting-edge research papers shedding light on topics such as genetic mutations, clonal evolution, tumor heterogeneity, metastasis, and therapeutic resistance. Through collaborative efforts, we aim to deepen our understanding of tumor dynamics and pave the way for innovative strategies in cancer management. Join us in this endeavor to advance this field and make a meaningful impact on patient care.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
