

## Special Issue

# New Insights into the Pathophysiology of Gynecological Cancers 2.0

### Message from the Guest Editor

Endometrial and ovarian tumours are the most preponderant and deadliest gynaecological cancers. Classical chemo and radio therapeutic approaches are hampered by toxicity and show limited efficacy especially at advanced disease stages. In this scenario, the identification of key targets and development of new therapies are in demand. This Special Issue is open to studies aimed at the (1) identification/description of new relevant pathways in the onset and progression of the disease and (2) assessment of the potential therapeutic effects of alternative approaches by functional experimentation in disease models.

---

### Guest Editor

Dr. Raúl Gómez

1. Research Unit on Women's Health-INCLIVA, Institute of Health Research, 46010 Valencia, Spain
2. Department of Pathology, University of Valencia, 46010 Valencia, Spain

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
