

## Special Issue

# Molecular Mechanisms of Tumor-Induced Cardiac Diseases

### Message from the Guest Editor

Cancer and cardiovascular diseases are the two most common causes of death. This Special Issue 'Molecular Mechanisms of Tumor-Induced Cardiac Diseases' aims to delve into the intricate relationship between tumors and cardiac pathologies at the molecular level.

Research on this emerging field is evolving rapidly all across the globe. There is a dire need to exchange experiences and information because the different cardiac complications that occur during cancer treatment are rather extensive. Currently, researchers are focusing on specific cancer therapies and their cardiotoxicities, especially those relating to immunotherapies.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
