

Special Issue

Molecular Mechanisms and Pathophysiology of Cardiovascular Disease

Message from the Guest Editors

Even in the 21st century, cardiovascular diseases (CVD) remain a significant health issue worldwide. As early as in 2001, these diseases were recognized as the largest single cause of mortality on the planet. Today, despite the huge growth of pathophysiology knowledge and advances in molecular mechanisms, prognosis, diagnosis, and treatment, CVD remain at the world's top rank of all human death causes. In fact, the impact of CVD is growing and has reached pandemic proportions, mainly due to the great incidence of obesity in the global population. This Special Issue focuses on molecular mechanisms (vascular calcification, endothelial dysfunction, inflammation, oxidative stress, etc.) (endothelial cells, macrophages, vSMCs, platelets, cardiac myocytes, and extracellular vesicles) and pathophysiology of CVD contributing to better understanding their development, providing insights to guide designing future, more personalized, medicine. We warmly welcome submissions, including original papers and reviews, on this widely discussed topic.

Guest Editors

Dr. Maria Gonzalez Barderas

Vascular Pathophysiology Lab, Hospital Nacional de Parapléjicos, Finca la peraleda s/n, 45071 Toledo, Spain

Dr. Fernando de la Cuesta

Department of Pharmacology and Therapeutics, School of Medicine, Universidad Autónoma de Madrid, Madrid, Spain

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"José Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, MEDLINE, Embase, CAPlus / SciFinder, and other
databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
