

## Special Issue

# Prebiotics and Probiotics: Healthy Biotoools for Molecular Integrative and Modulation Approaches

### Message from the Guest Editors

Helpful bacteria in the colon have many important functions that include increasing mineral homeostasis, strengthening the intestinal barrier, regulating the immune response and therefore human health and wellbeing. Hence, probiotics and prebiotics are food bioproducts that exert key functions in maintaining human gut eubiosis and are specially designed for this purpose. The diversity of prebiotic substances, probiotic microbes, and the influences that they may respectively exert mean that any health-enhancement claims must be supported by experimental and clinical data. However, the molecular mechanisms and interactions of prebiotics and probiotics with their specific targets for immune responses are not well known, and such information will help to identify new alternative compounds as therapies against various pathologies. In this Special Issue, we welcome innovative and original research articles, as well as high-quality review articles with pioneering opinions with a focus on probiotics and prebiotics and balance host health/disease, related to their antibacterial roles.

### Guest Editors

Prof. Dr. Abdelali Daddaoua

1. Department of Biochemistry and Molecular Biology II, Faculty of Pharmacy, University of Granada, 18011 Granada, Spain
2. Instituto de Investigación Biosanitaria (IBS), 18014 Granada, Spain
3. Institute of Nutrition and Food Technology "José Mataix", Center of Biomedical Research, University of Granada, Avda. del Conocimiento s/n. Armilla, 18016 Granada, Spain

Prof. Dr. Margarita Aguilera

1. Department of Microbiology, Faculty of Pharmacy, University of Granada, 18011 Granada, Spain
2. Instituto de Investigación Biosanitaria (IBS), 18014 Granada, Spain
3. Institute of Nutrition and Food Technology "José Mataix", Center of Biomedical Research, University of Granada, Avda. del Conocimiento s/n. Armilla, 18016 Granada, Spain

### Deadline for manuscript submissions

closed (31 December 2022)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
