# Pathogenesis and Novel Therapeutic Approaches for Sarcomas

### Message from the Guest Editor

Malignant bone and soft tissue tumors (sarcomas) are relatively common neoplasms. Some of them are typical of the pediatric age, with all the social, medical, and family stress that this entails. In general, low-grade tumors show a tendency of local recurrence and are often difficult to resect surgically depending on the location. In addition, low-grade sarcomas do not usually show a good response to adjuvant cancer treatments. On the other hand, high-grade sarcomas are very aggressive and have a tendency to metastasize at a distance, and although they show a better response to cancer treatment they usually create resistance to them over time, and the disease ends up progressing. For all of these reasons, it is important to find new therapeutic targets that help us control the spread and progression of the disease. For this, it is important to study the structure, immunophenotype, and molecular alterations of each tumor that help us to better understand the biology of this characteristic group of neoplasms.

### Guest Editor

Dr. Francisco Giner

Department of Pathology, University Hospital "La Fe", 46009 Valencia, Spain

### Deadline for manuscript submissions

20 May 2026

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
