Aging and Age-related Disorders: From Molecular Mechanisms to Therapies

Message from the Guest Editor

The focus of this *International Journal of Molecular Sciences* Special Issue is on molecular and cellular mechanisms, diagnostics and therapies of aging and age-related disorders. The Special Issue will highlight the strategies used by evolutionarily diverse organisms for coordinating various longevity-defining cellular processes in space and time, critically evaluate the molecular and cellular mechanisms underlying such coordination, and outline the most important unanswered questions and directions for future research in this vibrant and rapidly-evolving field.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
