

Special Issue

Amino Acid and Peptide Synthesis

Message from the Guest Editors

This Special Issue presents the latest developments in amino acid and peptide synthesis. Peptides control a wide range of physiological processes, and interact with the biological targets involved in different pathologies, thus providing a vast opportunity for biomedical applications. Original research articles and review articles covering all areas of peptide synthesis, with a particular emphasis on the synthesis of modified amino acids and peptides are welcome in this Special Issue, so as to provide readers with novel insights into the synthetic strategies in this interesting research area.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
