# **Special Issue**

## Antimicrobial Peptides and Immunology

### Message from the Guest Editors

This issue invites studies identifying novel and known antimicrobial peptides (AMPs) in the animal kingdom and in human beings; characterizing their immunomodulatory potential and mechanisms at the cellular and molecular level, as well as their antimicrobial role against dangerous pathogens for different hosts; and exploring AMPs' biological use in clinical therapies in human health. The outcome of the studies collected here will represent a further step in our comprehension of the innate immune system of multiple organisms and the identification of novel treatments for infective diseases with a focus on AMPs.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### **Editor-in-Chief**

#### Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
