Discovery of Antibody Biomarker

Message from the Guest Editor

Biomarkers are important and indispensable not only for diagnosis but also for the identification of therapeutic targets. Autoantibodies have causal roles in autoimmune diseases, and may affect the development of cancer. The recent development of technology has revealed that autoantibodies are developed against most proteins in the body. Such autoantibodies may reflect an individual's medical history. Therefore, autoantibodies can be applicable for diagnosis of other varieties of diseases in addition to autoimmune disease and cancer. Antibody levels are tremendously increased by repeated exposure to antigens. Therefore, antibody markers are highly sensitive and capable of discriminate trivial alterations of cells and organs. It has been suggested that autoantibodies sometimes play causal roles in other diseases than autoimmune diseases. Thus, analysis of autoantibodies is effective in the identification of therapeutic targets. Remarkable development of antibody biomarkers is expected in the future.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
