

Special Issue

Advanced Antiviral and Antimicrobial Drug Discovery

Message from the Guest Editor

We hope this constellation of articles may stimulate the scientific minds of our readers and open up fruitful avenues for biomedical exploration into underdeveloped scientific research spaces. The following is a list of research topics of interest to this Special Issue.

- Protein–protein interactions (PPIs) vital for viral/microbial replication.
- In silico drug screening.
- Development of anti-HIV drugs that target gene expression.
- Further application of computational chemistry for drug development.
- Future perspectives.

Guest Editor

Prof. Dr. Takashi Okamoto

Department of Molecular and Cellular Biology, Graduate School of Medical Sciences, Nagoya City University, Nagoya 4678601, Japan

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
