

## Special Issue

# Biological Systems at the Protein Level 2.0

### Message from the Guest Editor

Dear colleagues, Biological systems can be defined at the level of cells through to plants and animals. These systems can respond to a variety of stimuli or environmental conditions. The protein and molecular responses can be measured by a variety of methods, often using mass spectrometry. Of particular interest are quantitative expression profiling (proteins or metabolites), response-associated post-translational modifications, and pathway analysis.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
