Molecular Biomarkers in Multiple Sclerosis and Its Related Disorders

Message from the Guest Editor

Molecular biomarkers represent a unique accessible window into the human central nervous system (CNS) and continue to shape our understanding of pathophysiology and therapeutic mechanisms of action in autoimmune inflammatory CNS disorders. Molecular biomarkers are being used in routine clinical practice to diagnose these disorders, inform prognosis and guide therapeutic decisions.

Undeniably, recent decades have seen myriad molecular biomarker studies in multiple sclerosis resulting in a dead end. However, molecular biomarkers have nevertheless gained eminent clinical importance in the field of autoimmune inflammatory CNS disorders.

I invite authors to submit experimental work or critical reviews that align with the goal of this Special Issue of increasing the understanding of how molecular biomarkers may deepen pathophysiological understanding or inform diagnosis, prognosis and therapeutic management in patients with multiple sclerosis or its related disorders. As a Guest Editor, I guarantee that every manuscript submitted for this Special Issue will undergo rapid but careful evaluation.

Guest Editor

Dr. Mathias Buttmann

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
