

# Special Issue

## Breast Cancer Chemotherapy

### Message from the Guest Editor

Breast cancer remains one of the most common cancers in women, and despite improved early diagnosis and treatments, many women will still die from this disease. This Special Issue on "Breast Cancer Chemotherapy" will gather reviews and original research articles highlighting our successes as well as ways we can learn from our failures in breast cancer management. Topics gathered will emphasize ways to improve personalized breast cancer management using genomics and other biomarkers, improve the selection of patients for specific treatments, underscore CDK4/6 inhibitors' success in advanced disease but conflicting results in early disease, and novel therapeutic approaches, especially for triple-negative and HER2+ breast cancers. We invite contributions of original research papers, up-to-date review articles, and short commentaries about breast cancer at basic, translational, and clinical levels and anticipate that we will provide a Special Issue with expert insights and perspectives on advances in the field of breast cancer management.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
