Role of CaM Kinase II in Nervous System

Message from the Guest Editor

Since Ca²⁺/calmodulin-dependent protein kinase II (CaMKII) was discovered, the kinase has been established in the essential roles for consolidation and recall memory in rodents. Importantly, de novo CaMKII mutations in human genome studies have been shown to be associated with intellectual disability and neurodevelopmental disorders. To rescue and make individual therapeutics for intellectual disability and neurodevelopmental disorders in humans, we should define the precise causative mechanism and diagnosis to create precision medicine targeting for CaMKII. In this Special Issue, you are welcome to propose concepts for synaptic regulation and circuit modulation by CaMKII signaling using molecular biology, brain imaging, molecular genetics, and AI procedure. We also invite topics on how epigenetic and genetic mutations of transcription factors elicit aberrant CaMKII activity related to memory and cognition disturbance in animals. We will make a strong research network to dissolve the problems of intellectual disability and neurodevelopmental disorders in humans in this Special Issue.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
