Peculiarities of Transcription Factors in Cancer for the Development of Novel Therapies

Message from the Guest Editor

Transcription factors are often inappropriately expressed or activated in cancer, and cancer cells often become addicted to these transcription factors.

Additionally, transcription factors often serve as a convergence point of many upstream signaling pathways. Taken together, this suggests that targeting transcription factors would be beneficial for cancer therapy. While some transcription factors, such as nuclear hormone receptors, have been successfully targeted in cancer, most other transcription factors remain difficult to target. This Special Issue of the *International Journal of Molecular Sciences*, entitled “Peculiarities of Transcription Factors in Cancer for the Development of Novel Therapies”, aims to identify new features of transcription factors in cancer that may promote their druggability, to identify new drugs or treatment strategies targeting transcription factors, and to examine the current methods used to identify novel therapies targeting transcription factors.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
