Carbohydrate-Active Enzymes: Structure, Activity and Reaction Products

Message from the Guest Editor

This Special Issue aims at gathering new research results to broaden our understanding about carbohydrate-active enzymes, their mutants and their reaction products at the molecular level. It focuses on enzymes active in the biosynthesis, modification and degradation of oligo and polysaccharides, and glycoproteins and glycolipids. Authors are invited to submit their original research and review articles.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
