

Special Issue

Advanced Applications of Carbon-Based Adsorbents

Message from the Guest Editors

The papers for this Special Issue should be focused mainly, although not exclusively, on advanced practical applications of carbon-based adsorbents such as graphitic carbons, graphene, carbon nanotubes, activated carbon fibers, and fullerene-based materials, excluding those obtained with active charcoals. Papers discussing the physical-chemical characterization of carbon-based adsorbents using spectroscopic techniques are also welcome, especially when dealing with those molecular-level interactions affecting performance. Papers dealing with modifications of carbon-based adsorbents (including electrochemical modulation) will also be included, as far as evidence is provided of advantages that their use has in terms of ease of use and economic reward. Emphasis should be given to investigations on those aspects, such as adsorption (either in gas or liquid phases), catalysis, and functionalization processes of carbon-based materials, that can lead to original and challenging applications in various scientific fields, such as advanced materials technologies and environmental, separation, and biological sciences.

Guest Editors

Prof. Dr. Carlo Crescenzi

Dr. Paolo Ciccioli

Prof. Dr. Sara Bogialli

Prof. Dr. Maria Sarno

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
