

Special Issue

Cardiovascular Complications of Diabetes

Message from the Guest Editors

In this Special Issue, we seek experimental papers at the cellular, animal model or clinical level and insightful reviews, which:

- Define the mechanisms through which hyperglycaemia and insulin resistance cause cardiovascular diseases;
- Examine mechanisms and pathways for preventing hyperglycaemia and cardiovascular disease;
- Provide new insights into the role of natural products in protecting against the cardiovascular complications of diabetes;
- Define the efficacy of new and emerging anti-hyperglycaemic medicines in preventing diabetes-associated cardiovascular disease.

Guest Editors

Prof. Dr. Peter J. Little

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
