# Capillary Electrophoresis for Amino Acids Analysis: From Analytical Development to Biomedical Application

### Message from the Guest Editors

This Special Issue will cover the most important evolutions in CE analysis during the last few years. It will focus on the analysis of amino acids by CE coupled to conductivity, fluorescence or mass spectrometry, from analytical development to biomedical applications. Subtopics include, but are not limited to:

- CE development and coupling with MS for the analysis of amino acids;
- Specific detection of D-amino acids by CE;
- CE/conductimetry and CE/fluorescence for amino acids analysis;
- CE for biomedical applications.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
