

## Special Issue

# From Molecular Interactions to Cellular Metabolisms in *Drosophila*

### Message from the Guest Editors

The physiological functions of cells or regulation of their development, which are well conserved from invertebrates to vertebrates, are controlled by many molecular and cellular mechanisms. The molecular interactions are essential to understand the function and characterization of protein and/or predict the biological processes. In this Special Issue, we will recruit original articles and reviews that provide novel insights into the molecular interactions/cells metabolism in *Drosophila*.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
