Roles of Cytokines in Lymphocyte Development and Function

Message from the Guest Editor

Cytokines play an important role in the process of lymphocyte development by regulating cell growth and inducing lineage-specific gene expression and cell survival. Cytokines are also necessary for proper immune responses by T and B lymphocytes. Due to the advance of technology, our knowledge of molecular mechanisms in the regulation of lymphocyte development and function has been updated. We encourage investigators to submit original or review articles that are concerned with the role of cytokines in lymphocyte development from hematopoietic stem cells, as well as immune response by mature lymphocytes.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
