Molecular Mechanisms Underlying Chronic and Degenerative Diseases

Message from the Guest Editor

Chronic-degenerative disorders have become a growing pandemic for older adults. Although today there is a greater comprehension of the mechanisms underlying the pathogenesis of these disorders, current therapies still have limited impact, and mortality remains too high. Thus, there is a keen interest in understanding the mechanisms behind chronic-degenerative disorders' pathogenesis providing the basis for identifying novel therapeutic targets and developing new treatments. This Special Issue's primary goal is to present the readers of IJMS with an update regarding the most advanced knowledge of how molecular factors are responsible for the onset and progression of these chronic disorders. This Issue welcomes the submission of original articles and reviews focused on:

- (1) Molecular mechanisms involved in chronic-degenerative disorders.
- (2) Clinical evidence that links molecular mechanisms with the pathogenesis of chronic-degenerative disorders.

- chronic
- degenerative
- disorders
- pathogenesis
- mechanisms

Please feel free to contact me if you have interest in contributing a paper to the special issue.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
